 ***An update will be provided with the invitation***

## STAGE PLAN CERHA

*\*NOTE: On the recommendation of Martin Grubinger:*

*The Tom-Tom setup (1st and 3rd movements) will be positioned in front of the audience during the concert. This means that the audience will see the soloist from the front rather than from the side.*

*The xylophone setup (3rd movement) will be placed slightly to the side of the conductor to ensure that the audience has an optimal view of the soloist.*
